

BRAND CONCEPT

Histolab, a Skin Science Cosmeceutical brand

HISTOLAB, a medical skin care brand distributed solely to dermatological clinics, has been devoting itself to accomplish an immediate skin improvement by taking advantage of its own development of Plant Stem Cell (Callus) and of our renowned mentoring group of doctors' advice for achieving the most effective prescription

3S · Skin · Science · Specialist

Currently, Histolab products are loved by almost 8,500 dermatological and aesthetic clinics in Korea. Thanks to its wide variety of product ranges, Histolab products has become famous for having excellent efficacies in the field of professional peeling, acne treatment and post-laser skin treatment as well as basic cares like wrinkle improvement, freckles, skin rejuvenation and whitening, etc

That's how we became known to be a cosmeceutical brand that provides distinguished solutions to respective clinics. In order to make cosmetics more effective and safer, all of Histolab products have been developed in co-op with professional dermatologists and go through various clinical tests in its own lab. We have also been paying close attention to our clients' opinions and feedback for improvement and better development for each product.
